Purpose of Modification: This proposal seeks to modify the System Operator Transmission Owner Code (STC) to reflect the creation of a new National Grid Electricity System Operator (NGESO) that is legally separated from National Grid Electricity Transmission Limited. References to NGET have been replaced by NGESO, where relevant, throughout the STC Sections and Schedules in order to ensure the System Operator and Transmission Owner obligations are clear.

	<p>The Proposer recommends that this modification should:</p> <ul style="list-style-type: none"> proceed to Consultation <p>This modification was raised 17 April 2018 and will be presented by the Proposer to the Panel on 25 April 2018. The Panel will consider the Proposer’s recommendation and determine the appropriate route.</p>

Timetable

The timetable was approved at the Panel on 25 April 2018.

STC Modification Proposal issued to the STC Panel	25 April 2018
Panel agreed that CM069 should proceed using the normal governance route	25 April 2018
Issue Industry Consultation for 20 Working days	31 May 2018
Industry Consultation Closes	28 June 2018
Issue Draft Final Modification Report to Industry and Authority for 5 Working days	9 July 2018
Draft Final Modification Report issued to the STC Panel	17 July 2018
Panel Recommendation Vote	25 July 2018
Final Modification Report issued to the Authority	7 August 2018
Indicative Authority Decision	11 September 2018
Implementation	1 April 2019

STC Schedule 15 – Transmission Interface Agreement

For information:

1. Sections B, C, D and G will be the subjects of separate Modification Proposals each to be submitted to the STC Modification Panel in parallel to this one;
2. There is no requirement for Schedule 2 to be modified and hence has been omitted from this Modification Proposal;
3. A Modification Proposal for Schedule 4 will be submitted by the JPC;
4. Schedule 14 of the STC is not used and hence has been omitted from this Modification Proposal.

Impact on Core Industry Documentation.

CUSC	<input type="checkbox"/>
Other	<input type="checkbox"/>

Although this modification proposal does not directly impact other industry codes, other proposed modifications to industry codes (Grid Code, CUSC, BSC, Distribution Code, DCUSA, SQSS) are being raised in parallel to this modification proposal as a result of creating a legally separate system operator.

1 Summary

Defect

The STC defines the relationship between the Transmission System Owners and National Grid as the National Electricity Transmission System Operator (NETSO).

Following legal separation of the System Operator and Transmission Owner within National Grid Group, on 1st April 2019, the STC will no longer place the correct relevant obligations on those two National Grid new legal entities.

What

It is proposed that the structure of the STC is modified to introduce the new NGENSO legal entity, and the existing NGET legal entity in a new role as a relevant transmission licensee.

The relevant obligations of the System Operator will move to NGENSO and National Grid Electricity Transmission plc (NGET) as a Transmission Owner will reflect obligations already in the STC that currently apply to Onshore Transmission Owners.

Why

Changes are required to NGET's existing licence required to implement legal separation; all system operator obligations will be transferred into a new transmission licence for the NGENSO and as such need to be reflected accordingly within the electricity codes. The licence changes are the subject of ongoing consultation¹.

How

NGET published an open letter on its approach to modifying the relevant Industry Codes on 22 September 2017² stating that NGET intended to raise one Code Modification proposal for each Industry Code, but further work into assessing the changes required means that for the STC, 5 modifications need to be raised. CMXXX is the one of these.

The introduction of NGENSO will be throughout the whole of the STC in its Sections and Schedules except Schedule 2, where there is no reference to NGET currently hence no modification is required.

This Modification Proposal CM069 excludes Sections B, C, D and G and Schedule 4 which will each be submitted as separated Modification Proposals.

2 Governance

Justification for Normal Procedure

The Proposer does not see any justification for either the Self-Governance or the Urgent Modification processes to be used and that the normal governance process should be followed with the Authority making the decision.

The STC Modification Panel has already had an opportunity to see the Proposers draft proposed text and no issues have to date been raised to imply a different governance process would be preferable.

Requested Next Steps

This modification should:

- proceed to Consultation

3 Why change

Following the joint statement titled “Statement on the future of Electricity System Operation” issued by BEIS, Ofgem and National Grid on 12 January 2017³ and consequential consultation response by Ofgem on ESO separation on 3 August 2017⁴, the obligations in the STC will need to be modified to reflect the System Operator requirements and to place the current Transmission Owner requirements on NGET as a Transmission Owner.

NGET and NGESO will become separately licensed entities as a consequence of NGET partially transferring its existing licence to NGESO (the System Operator elements only) to NGESO under section 7A Electricity Act 1989 and NGET will retain the Transmission Owner elements.

4 Code Specific Matters

Technical Skillsets

N/A

Reference Documents

Please refer to Section 3. Above for further information.

³ Consultation and Decision documents [Future Arrangements Electricity System Operator](#)

⁴ Ofgem’s Consultation Response [Future Arrangements Electricity System Operator Ofgem Response](#)

5 Solution

NGET has been replaced by NGESO where relevant throughout the STC Sections and Schedules in order to ensure the SO and TO obligations are clear.

6 Impacts & Other Considerations

All parties to the STC are impacted, to the extent that the relationship between the all Transmission Owners will change to be with NGESO not NGET.

Does this modification impact a Significant Code Review (SCR) or other significant industry change projects, if so, how?

N/A

Consumer Impacts

N/A

7 Relevant Objectives

Mandatory for the Proposer to complete.

Relevant Objective	Identified impact
(a) efficient discharge of the obligations imposed upon transmission licensees by transmission licences and the Act	Positive
(b) development, maintenance and operation of an efficient, economical and coordinated system of electricity transmission	
(c) facilitating effective competition in the generation and supply of electricity, and (so far as consistent therewith) facilitating such competition in the distribution of electricity	
(d) protection of the security and quality of supply and safe operation of the national electricity transmission system insofar as it relates to interactions between transmission licensees	
(e) promotion of good industry practice and efficiency in the implementation and administration of the arrangements described in the STC.	

(f) facilitation of access to the national electricity transmission system for generation not yet connected to the national electricity transmission system or distribution system;	
(g) compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency.	

The Proposer believes that this change will better facilitate relevant objective (a), by attributing the appropriate obligations to NGESO as System Operator and the Transmission owners in accordance with the new NGESO Transmission Licence and modified NGET Transmission Licence obligations.

8 Implementation & Transition

Legal text for CM069 has been drafted using the baseline of April 2018 STC text and as the modification progresses through the governance process, the text may need to be revised in light of Business as Usual modifications to the STC. The Code Administrator will ensure that the Proposer is aware of any Business as Usual Modification Proposals and the Proposer will take into account any relevant amendments to the CM069 that may need to be made prior to 1 April 2019 and notify the STC Modification Panel should anything in CM069 require further modification as a result of this.

CM069 may require transitional changes to the STC and these will be discussed with the STC Panel and drafted into the legal text CM069 as and when the Proposer becomes aware of these.

CM069 together with the other four associated STC Modification proposals and the associated STC novation agreement in respect of National Grid's legal separation are all interdependent and as such, are all required to be implemented as a single update to the STC on 1st April 2019 following The Authority's determination.

9 Legal Text

Text Commentary

Due to the many places 'NGET' has been replaced with 'NGESO' throughout the STC, the proposed Legal Text for the relevant Sections and Schedules can be found in Attachments 1-19

10 Recommendations

Proposer's Recommendation to Panel

Panel is asked to:

Issue this modification directly to Consultation.
