

# Daily Balancing Costs

BSUoS Charge Estimate: £1.45/MWh  
Total Outturn: £1.40m

■ BM Cost (Indicative)  
■ AS Cost (Estimate)

## Commentary

150 MW of STOR was run in the morning pickup. Trades were carried out on the interconnectors overnight for Rocof, additionally a generator in the north was used as well. Generation was bought off in Wales for a local constraint.

Note: A new category - Other Reserve - has been more clearly defined. Costs in this category used to be mapped to either Positive Reserve or Fast Reserve. These costs include BM Startup, Fast Start and some Hydro services. These changes have been made to align with the new Monthly Balancing Services Summary report.
