

Daily Balancing Costs

BSUoS Charge Estimate: £1.34/MWh
Total Outturn: £1.27m

■ BM Cost (Indicative)
■ AS Cost (Estimate)

Commentary

350MW of STOR was run for the early evening pick up. Trades were carried out overnight on the interconnector for Rocof and a constraint in the South. A machine was traded for voltage support in the north west. Also machines were traded for voltage support in Wales.

Note: A new category - Other Reserve - has been more clearly defined. Costs in this category used to be mapped to either Positive Reserve or Fast Reserve. These costs include BM Startup, Fast Start and some Hydro services. These changes have been made to align with the new Monthly Balancing Services Summary report.
