

RfG: Banding Workgroup Report

Richard.Woodward@nationalgrid.com

Workgroup report purpose

- This document is intended as a workgroup **report**
- Subject to completion, it **could** evolve into a workgroup/industry consultation (acknowledging the code is still to enter into force)
- Generator and DNO insights are still being sought to supplement what's already in Draft 1 (see next slide)
- Feedback on Draft 1 has been received (**thank you!**) and is being consolidated into Draft 2
- This is a GC0048 workgroup report – not just a NGET report. Your submissions are vital for making this happen

Workgroup report strategy

Report Draft 1

NETSO view on banding thresholds

Workgroup progress summary

Indicative view of generator compliance

Date:

March 2015

Status:

Created - In review

Report Draft 2

Draft 1 +...
