14 February 2019

Dear Industry Colleagues

**Firm Frequency response: Tender round TR111**

This publication is to inform you that National Grid has made the decision to run Firm Frequency Response (FFR) Tender Round 111 (TR111) as a month ahead only tender instead of a full tender.

Appendix 8 (Forward look at requirements) in the Market Information Report which was published in January 2019 indicated that National Grid had little or no dynamic long term requirement to procure in this tender round and therefore the decision was made to change TR111 to month ahead only. Non-dynamic long term requirements will be carried forward into June 19 long term tender round (TR114). Any shorter-term requirements will be procured through monthly tender rounds.

Yours sincerely,

**Ben Smith**  
**Contracts Manager**
