

Date: **Wednesday 23 Oct 2019**

BSUoS Charge Estimate: £5.93/MWh
Total Outturn: £8.89m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Western Link status: Available

Commentary

The market was mostly short, with long peaks briefly just after midday, and late evening onwards. 219MW of STOR was run in the early evening. Alongside limited capacity on the Western Link interconnector, BM Actions were required overnight and throughout the day to manage thermal constraints in Scotland and the North West. Interconnector Trades between early morning and late afternoon managed power flow constraints in the South East. Overnight Voltage Control managed with BM Actions for the Midlands, South and South East. Trading overnight secured RoCoF risk.
