

Date: **Wednesday 30 Oct 2019**

BSUoS Charge Estimate: £1.82/MWh
Total Outturn: £2.45m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Western Link status: Available

Commentary

The market was generally long throughout the day but was short between 2pm and 7pm. Interconnector Trades managed thermal import constraints in the South East overnight and throughout the day. BM Actions were required in addition to resolve for this area. BM Actions also required to ease localised power flow constraints in Scotland. Overnight RoCoF risk mitigated with Trading, and some BM Actions alongside. Voltage Support required minimal BM Action, with actions taken in the South East late evening onwards.
