

Date: **Sunday 17 Nov 2019**

BSUoS Charge Estimate: £2.03/MWh
Total Outturn: £2.74m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

The market was prevalently short throughout the 24 hours. Short in excess of 600Mw overnight, and in excess of 1400MW in the evening. Additional dynamic response was deployed over the evening pick up for demand uncertainty. Interconnectors were traded for positive margin just before midnight. Overnight, trades and BM Actions were undertaken to manage the voltage levels in England, and RoCoF risk was secured with BM actions trades on generating units.
