

Code Administrator Meeting Summary

CMP317 Identification and exclusion of Assets Required for Connection when setting Generator Transmission Network Use of System (TNUoS) charges And CMP327 Removing the Generator Residual from TNUoS Charges

Date: 3 February 2020

Contact Details

Chair: Rob Marshall , National Grid ESO

Rob.Marshall@nationalgrideso.com
07824 518958

Proposer: Jon Wisdom, National Grid ESO

Jon.Wisdom@nationalgrideso.com

Key areas of discussion

The Workgroup discussed the following:

- Ofgem granted the CUSC Panel's request for the modifications to be amalgamated. The workgroup recognised that from a governance perspective, this would mean one report and a single solution for both modifications.
- The workgroup reviewed definitions of generator only spurs provided by workgroup members.
- Ofgem indicated that it would consider the inclusion of alternative solutions for this modification which involved the reference node. As this falls under the *Access and Forward Charges SCR*, Ofgem asked the workgroup to justify the inclusion of any such solution in writing. The Chair is writing to Ofgem for this purpose.
- The workgroup also reviewed the consultation document, with a view to consulting industry in the coming weeks. The workgroup is further reviewing this document via a WebEx on 7 February 2020, to finalised the content of the document.

Actions Log

Number	Action	Status
5	JW to investigate if a map/diagram is available that shows the typography of MITS in relation to the network and circulate	Open
9	ESO to update diagrams shared with workgroup showing physical assets required for connection	Open
