07970673220

Proposer Grahame Neale, National Grid ESO

[grahame.neale@nationalgrideso.com](mailto:grahame.neale@nationalgrideso.com)  
07787261242

### Key areas of discussion

- National Grid ESO provided further analysis on Nodal Tariffs, the use of DNO zones as a solution, the use of ETYS zones and analysis on increasing the £1/kW range to £2.25.
- The workgroup decided that they would not continue to develop any alternate solutions based on using ETYS zones, however there is interest within the workgroup at raising an alternate to the original CMP324 solution using an increased range based on RPI.
- The workgroup reviewed the draft consultation document and agreed the main structure of the report. The workgroup will have until midday on 24 February 2020 to provide further comments on the document. It is planned that the consultation will open next week for industry comment.

The next Workgroup will be arranged after the consultation period.

For further information, please contact the Code Administrator.

Action number	Date raised	Owner	Action	Date due
16	18 Feb 2020	GN	ESO to provide commentary in the report on the effects of changes in cost of capital and the expansion constant in the absence of RIIO-2 data.	20 Feb 2020
17	18 Feb 2020	GN	ESO to review what information is in the public domain re: RIIO-2 data	20 Feb 2020
18	18 Feb 2020	JG	CA to recognise in report potential for merging zones which include only 1 node within an RPI solution	20 Feb 2020
19	18 Feb 2020	GN	ESO to consider how tariffs will be presented for zones in which there is no chargeable generation connected (West Midlands - Zone 8)	20 Feb 2020
20	18 Feb 2020	JG	CA to ensure the term "GSP Groups" is used consistently throughout the report	20 Feb 2020
