Key areas of discussion

- CMP335/6 has been decided as Urgent by the Authority, which means it can have shorter consultation periods than Workgroups under normal timescales. An indicative Urgent modification timeline was shared with the workgroup for feedback – the amended version will be shared at the next meeting.
- The Workgroup discussed the three areas that will be addressed under CMP335/6:
 - **Allocating the bands:** Create a process for allocating Final Demand Sites (as defined under CMP334) to the bands (determined under CMP332) as per paragraphs 24 and 25 of the Direction
 - **Dispute resolution:** Determine if existing processes for dispute resolution (CUSC Section 7.2 & 7.3) remain effective as per paragraphs 32 and 36 of the Direction
 - **Billing processes:** Update Demand TNUoS billing processes for the revised CMP332 methodology
- Further consideration was required in some areas, which is summarised in the Actions below.

Action	Owner	Due by
Reduce Panel timescales to allow more time for Code Administrator Consultation	PM	9 March 2020
Consider any interaction with CMP311 to share back with Workgroup regarding Credit Monitoring	GN / EH	9 March 2020

Share response from Ofgem (once received) regarding whether the intention of the TCR decision was to include interconnectors in the “Final Demand” definition. Confirm what this means for interconnectors a) within UK and b) member states	GN / EH	9 March 2020
Conduct analysis on impact of inclusion/exclusion of interconnectors as “Final Demand”	GN / EH	9 March 2020
Investigate whether more frequent settlement runs can be carried out sooner than the RF (Reconciliation Final), to reimburse customers who successfully dispute bandings	GN / EH	9 March 2020

Next Steps

- The next Workgroup will be on 9 March 2020.
