Key areas of discussion

The workgroup discussed the following:

- The Proposer stated he was going to update his legal text in respect of:
 - The level of target frequency stated in the legal text to trigger the report; and
 - Increase the frequency of the reporting from annually (as currently drafted in the legal text) to monthly.
- It was agreed that further data was required from the National Grid Electricity System Operator (NGESO) representative on what level the target frequency triggers should be set to aid the finalisation of the legal text solution.
- In addition, the proposer stated he wished to include the one (1) second frequency data that is collected by NGESO (Historic Frequency Data Report) within the solution.
- The workgroup discussed the blackout that occurred on 9 August 2019 and the relevance of this event to this modification. The NGESO representative felt the 9 August 2019 blackout was not relevant to this defect and the latest NGESO report from 6 September dealt with next steps in relation to that event. However, other workgroup members disagreed.

Next steps

The workgroup agreed that the next workgroup meeting will take place on 2 October 2019, when it would consider whether it is able to vote on the workgroup report.

Actions

Number	Action	Status
