

## Code Administrator Meeting Summary

### GC0137: Minimum Specification Required for Provision of Virtual Synchronous Machine (VSM) Capability

Date: 9 April 2020

#### Contact Details

Chair: Joseph Henry, National Grid ESO

[joseph.henry2@nationalgrideso.com](mailto:joseph.henry2@nationalgrideso.com)  
07970673220

Proposer: Matt Baller, National Grid ESO

[Matt.Baller@nationalgrideso.com](mailto:Matt.Baller@nationalgrideso.com)

#### Key areas of discussion

The Workgroup discussed the following:

- The workgroup met for the first time. Antony Johnson of the ESO gave an introduction to the modification, detailing the reasoning for the modification was raised, building on the previous work carried out by the expert group prior to this modification.
- The workgroup reviewed the VSM specification put forwards by the ESO and discussed in detail. The workgroup agreed to review this specification and provide comment ahead of workgroup 2.
- The chair noted workgroup concerns around holistic working with GC0138 and GC0141. The chair took an action to update the members on the ongoing work on these modifications as they progressed, but advised that each modification should be looked at in isolation, against the baseline Grid Code.
- It was noted that GC0137 had been de-prioritised by the GCRP, and as such another meeting was unlikely to happen before July 2020.
