

## Code Administrator Meeting Summary

### **CMP317 Identification and exclusion of Assets Required for Connection when setting Generator Transmission Network Use of System (TNUoS) charges And CMP327 Removing the Generator Residual from TNUoS Charges**

Date: 15 May 2020

#### **Contact Details**

Chair: Rob Marshall, National Grid ESO

[Rob.Marshall@nationalgrideso.com](mailto:Rob.Marshall@nationalgrideso.com)  
07824 518958

Proposer: Jon Wisdom, National Grid ESO

[Jon.Wisdom@nationalgrideso.com](mailto:Jon.Wisdom@nationalgrideso.com)

#### **Key areas of discussion**

The Workgroup discussed the following:

- The workgroup further considered the implications of the P396 decision on what charges should be included in the calculation for annual average transmission charges.
- The workgroup considered a two factor approach to potential alternative solutions. A two step ex-ante adjustment module was added to potential solution modules, which would be used if the upper limit of the regulation were to be breached. This has resulted in 84 potential solutions for the modification.
- The workgroup will meet again on 28 May 2020, with an aim to move towards submitting its report to CUSC Panel in June 2020.
