

CUSC Alternative and Workgroup Vote

CMP339: Consequential changes for CMP317/327 (TCR)

Please note: To participate in any votes, Workgroup members need to have attended at least 50% of meetings.

Stage 1 - Alternative Vote

If Workgroup Alternative Requests have been made, vote on whether they should become Workgroup Alternative Code Modifications.

Stage 2 - Workgroup Vote

2a) Assess the original and WACMs (if there are any) against the CUSC objectives compared to the baseline (the current CUSC).

2b) If WACMs exist, vote on whether each WACM better facilitates the Applicable CUSC Objectives better than the Original Modification Proposal.

2c) Vote on which of the options is best.

The Applicable CUSC Objectives (Non-Charging) are:

(a) The efficient discharge by the Licensee of the obligations imposed on it by the Act and the Transmission Licence;

(b) Facilitating effective competition in the generation and supply of electricity, and (so far as consistent therewith) facilitating such competition in the sale, distribution and purchase of electricity;

(c) Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency *; and

(d) Promoting efficiency in the implementation and administration of the CUSC arrangements.*Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).

Workgroup Vote

Stage 1 – Alternative Vote

Vote on Workgroup Alternative Requests to become Workgroup Alternative Code Modifications.

The Alternative vote is carried out to identify the level of Workgroup support there is for any potential alternative options that have been brought forward by either any member of the Workgroup OR an Industry Participant as part of the Workgroup Consultation.

Should the majority of the Workgroup OR the Chairman believe that the potential alternative solution would better facilitate the CUSC objectives then the potential alternative will be fully developed by the Workgroup with legal text to form a Workgroup Alternative Code modification (WACM) and submitted to the Panel and Authority alongside the Original solution for the Panel Recommendation vote and the Authority decision.

Voting Statement: All WACMs which include Generator Only Spurs or Shared and pre-existing assets within the Limiting Regulation are better than Baseline and better than the Original. This view is based on the proposed exclusion criterion under Original and associated WACMs of all local circuits, irrespective of sharing. We believe that such an exclusion would be too wide and could lead to a breach of the Regulation. We believe the best to be WACM23 (CMP317/327 WACM81). This allows ESO to take into account all relevant Generator payments.

Stage 2b – WACM Vote (If required)
