6. Next Steps
7. Q&A session

#DCO1

Overview – DC Onboarding

Systems

- Performance Data – CSV submission
- Operational Data - Data Concentrator Platform
 - <https://www.nationalgrideso.com/document/150286/download>
- Section 15 of the Service terms

Contractual

Review contractual suite of documents for consultation responses.

Form A

(Provider)

Company
registration to form
Registered Service
Provider with
NGESO

Form B

(Provider)

Assigning Service
Selection for DC
participation.

Form C

(NGESO)

NGESO
Approval

(Accession to DC contractual terms)

Provider Data Template

- Draft template published as part of the consultation
- Functions:
 - Register eligible assets
 - Allocate to Response Unit

Activity	Provider	NGESO
Initial Registration of Eligible Assets	13 calendar days before any intended allocation activity	Deemed accepted upon submission, subject to errors and/or incomplete data
Allocation of Eligible Assets to Response Units	Allocation can only occur on a weekly basis and must be sent to NGENSO in the “market window” on a Tuesday via the DC Provider Data Template	Deemed accepted upon submission, subject to errors and/or incomplete data

Tender Template

Providers must submit this file during the Tuesday market window. Failure to do so will mean a party must wait until the following week to participate.

Following submission, a Registered DC Participant then has the ability to resubmit pricing or withdraw tenders on a daily basis (excluding weekends and Bank Holidays). This must be via an updated submission of the original DC Tender template and be submitted within the market window of that business day.

Next Steps

- Review the published documentation for the consultation process
- Welcome consultation responses ahead of the submission deadline
