Agenda

1. Introductions
2. **Presentation:** GC0133: Timely informing of the GB NETS System State condition (**Garth Graham, SSE**)
3. Any other business
4. Close

GC0133 GCDF

Wednesday 04 November 2020

Garth Graham, SSE Generation

Timely informing of the GB NETS System State condition

- Simple Modification
- Uses existing ESO process (to determine System State, real time, continuously)
- Uses existing publication route used by ESO today (BMRS)
- Just the System State needs to be reported
- No reason has to be provided (but ESO has the option, if it wishes, to add further detail)
- Single, GB NETS System State, data item with no site / region / location / user information provided

Process to date / send back

- Been to Code Administrator Consultation
- Three responses (Drax, NGENSO and SSE)
- Ofgem 'send back' 4th September - need to consider
 - 1. the benefits of the modification to market participants and stakeholders; and
 - 2. the challenges to the ESO of providing this information, including the challenges of publishing the reasons for the changes of system state condition.
- GCRP has determined a Workgroup be established

Any Other Business (AOB)
