Key areas of discussion

- Nisar Ahmed introduced the meeting and provided a recap for members, noting it would be important to make progress within this meeting to ensure the timeline for this modification would remain on track. He noted the timeline again and a recap of the modification process so members were aware of the stages it would need to progress through.
- Workgroup members noted that more time would be required to fully ensure that all feedback had been included in the report and so it was agreed that another meeting would be held towards the end of w/c 2nd November 2020 to do a final sign off. It was agreed that the report would be circulated ahead of the meeting to allow members time to review. The short timescales were because of the limited amount of overall time in which to ensure that the modification is in place for the May 2021 bank holiday.
- The workgroup discussed the main points that various members had commented on via email circulation in order that they be captured appropriately in the updated report.
