

Which Application For Me...?

Select Section

Completing My Application

New Connection Application - Directly Connected (BCA)

This application type is applicable for;

- Users who want to connect directly to the NETS.
- Both Demand and Generation users including interconnectors.
- Users who do NOT already have an existing agreement

New Generator Application - Embedded User (BEGA)

This application type is applicable for;

- Embedded users who want transmission access rights and to hold TEC.
- Users who are connected to a distribution network.

A BEGA is not a mandatory agreement e.g. if you are an embedded user in England & Wales under 100MW a BEGA is only required if you want access to the NETS.

New Generator Application - Embedded (BELLA)

A Bilateral Embedded License Exemptible Large Power Station Agreement is applicable for;

- Large embedded users in Scotland, e.g. >10MW in Scottish and Southern Electricity's network area and >30MW in Scottish Power's network area.
- Users who do NOT require transmission access rights

Note that BELLA agreements are not applicable within England & Wales

Statement of Works / Project Progression (SOW/PP)

This application type is applicable when;

- DNO companies have new embedded generation connecting to their network.
- SOW applicable for DNO GSPs not part of the Appendix G process.
- A Project Progression is required when DNO companies have breached allowed GSP headroom through the Appendix G process or as a result of a SOW submission.

Note SOW/PP is only for DNO companies in respect of embedded generation. If you're a small embedded generator, the DNO will apply to NGENSO via the SoW or Project Progression process to determine transmission reinforcement (if any) triggered by your connection.

Modification Application

This application type is applicable for;

- Users who already have a signed agreement with NGENSO.
- Users who wish to make a change to their existing agreement.
- Any agreement type e.g. BCA, BELLA, BEGA etc...

Once you've completed your application, please send to transmissionconnections@nationalgrideso.com and your NGENSO Contract Manager. We will validate and let you know of any question within 4 days of receiving your application, if there aren't any questions the team will submit your application to the relevant TO. The TO then has 5 days to assess your data and ensure they have everything they need to study the impact of your connection. Once your application fee has been paid and the relevant TO has declared your application as effective, we'll Clock Start your application. Once clock started NGENSO has 3 months to issue you with an Offer.
