

Agenda

Grid Code Development Forum

Date:	05 May 2021	Location:	Digital only meeting
Start:	10:00	End:	11:30

Agenda for Grid Code Development Forum (GCDF)

#	Topics to be discussed	Owner
1.	Introductions	Code Administrator
2.	Presentation: GC0150 - Incorporation of SOGL Article 119 and ramping requirements into the Grid Code	Louise Trodden, NGESO
3.	Code Administrator Update	Code Administrator
4.	AOB	All

GC0150 - Incorporation of SOGL Article 119 and ramping requirements into the Grid Code

Ramping conditions for active power output of HDVC interconnectors are not specified in the Grid Code. Requirements placed upon the Electricity System Operator (ESO) through System Operator Guidelines (SOGL) Article 119 require the ESO to align the Grid Code with European code. (It is worth noting that this requirement has been retained following Great Britain's exit of the European Union.)

A modification will be raised to address this compliance issue. This will also consider the operational factors related to the number of interconnectors we have connected to the system now, and those which are planned in the near future, and the existing ramp rate rules for BMUs in the Grid Code. We aim to develop this solution with industry and seek ways to ensure this balances the needs of all parties as much as possible while providing the best value to consumers.
