

1. BSC Modification Proposals impacting on the Grid Code

Ref No	Description	Impact on Grid Code	Status
P12	Reduction of Gate Closure from 3.5 to 1hr	Change required to GD-A1 (which is not formally part of the Grid Code). Resolution of "Beyond the wall " issues likely to require some clarification.	Assessment report to be presented to BSC Panel in March 2002.
P36	BOAs relating to Applicable Balancing Services.	May require some additions to BC2.	Assessment report due to BSC Panel 14/02/02.
P59	Acceptance of Bids and Offers to honour BM Units' Dynamic Parameters beyond the wall	Likely to be changes in BC2	Assessment report due to BSC Panel 14/02/02.

2. CUSC Amendment Proposals impacting on the Grid Code

CAP002	CUSC 6.5.1 clarification	Changed to PC and CC to ensure NO provides appropriate data. OC2/BC effect to be determined.	Paper presented to GCRP February 2002.
CAP010	Frequency Response Imbalance Exposure	May require some additions to BC2.	Identical in effect to P36. Being considered in BSSG
	Definition and use of MEC and Registered Capacity.	A definition of MEC in the Grid Code has been suggested by Innogy.	A "Working Group " meeting to discuss a possible CUSC amendment is being arranged.
