

# ASDP (PAS): ASR Frequency Response Changes

February 2022

Alastair Grey  
Manoj Swaminathan  
Sreedhar Tripasuri

The webinar will start shortly.

**Please join on mute.**

Please post your questions in the MS Teams chat. We invite attendees to ask questions on mic we're they'd like, during the Q&A at the end of the call

**Please note that the webinar will be recorded.**

# Agenda

- Introduction and explanation of why this change is being introduced
- Technical overview of Ancillary Service Dispatch System (ASDP)/ Platform for Ancillary Services (PAS)
- ASR Frequency Response Process
- Technical and Business Rules
- Next Steps
- Open mic Q&A

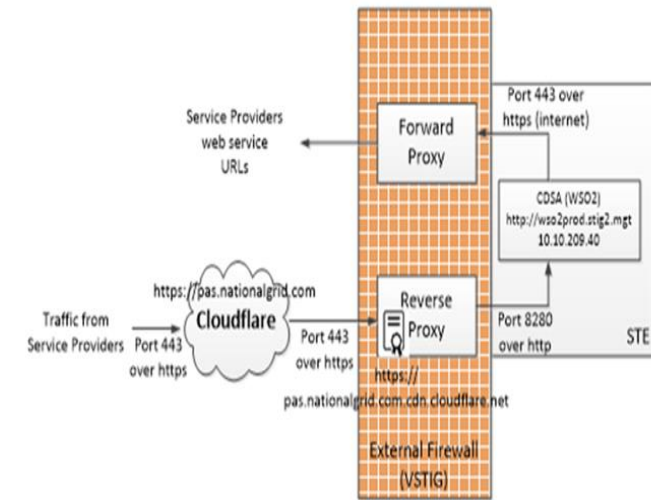

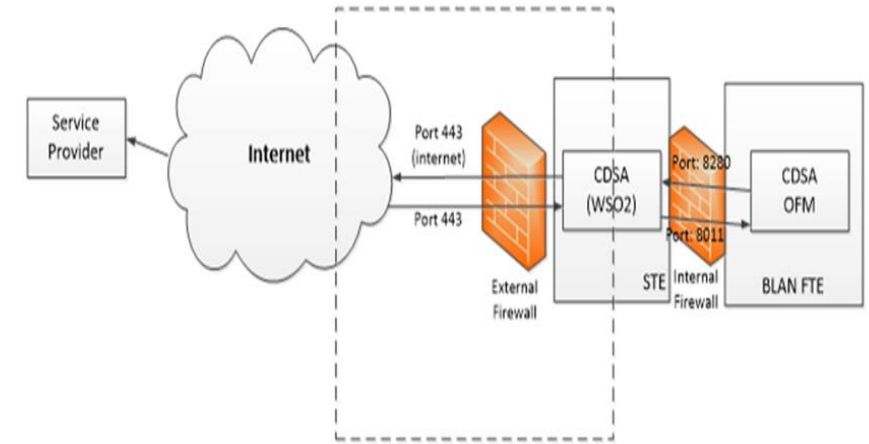

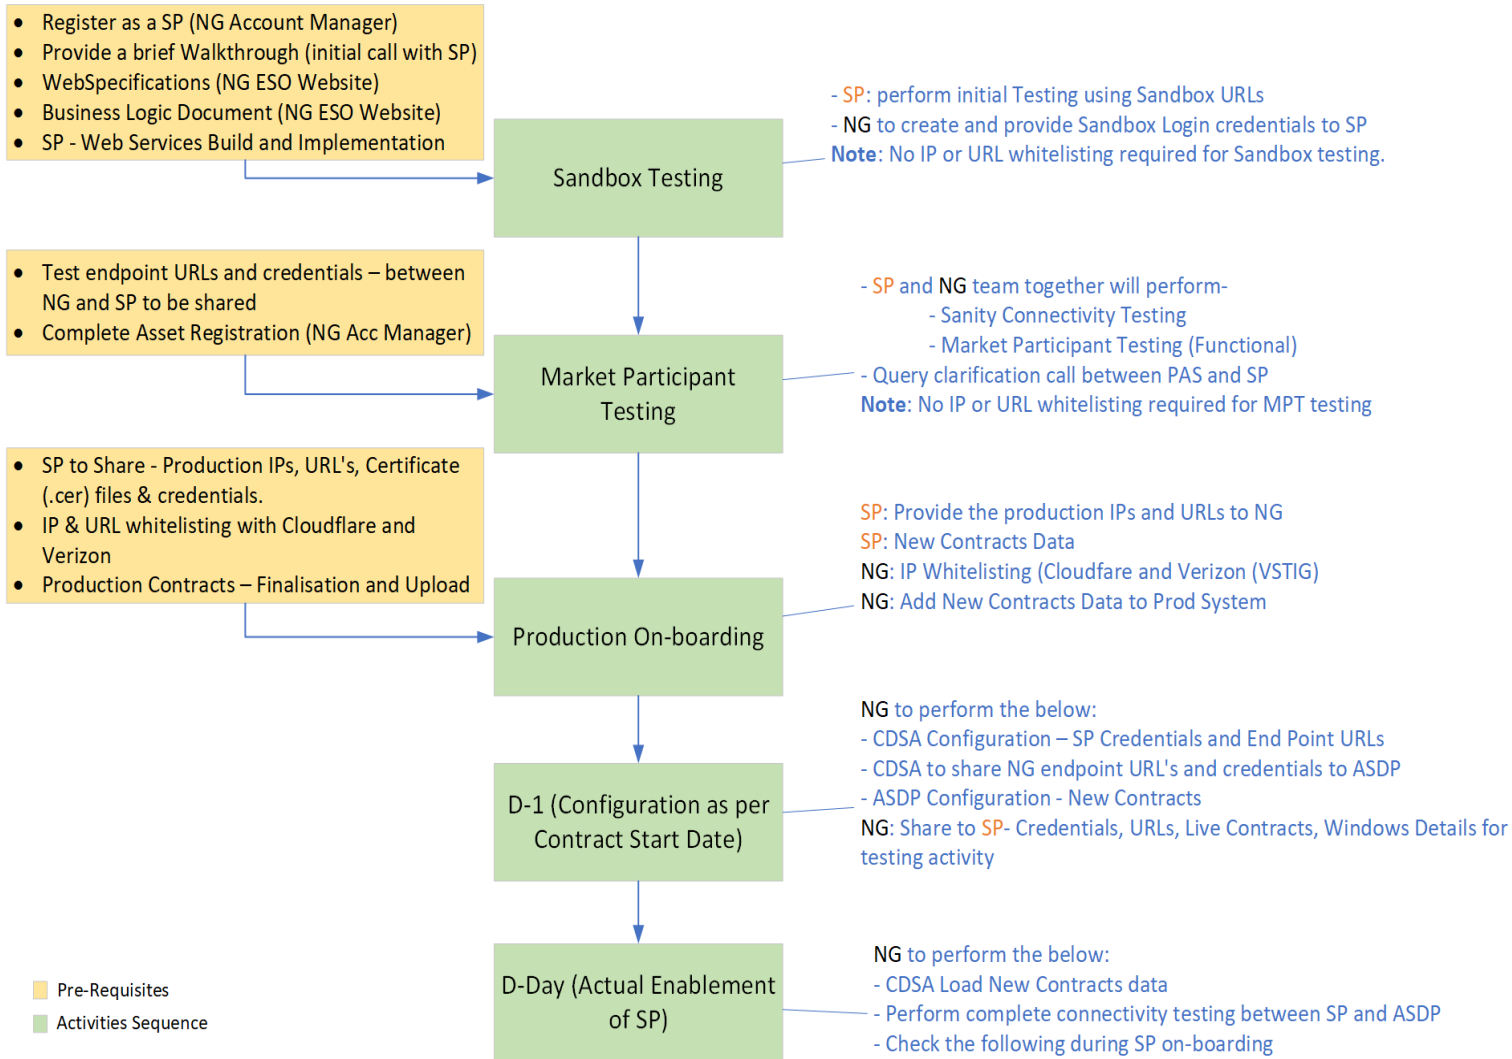

# Automating availability redeclarations for response services

	DM/DR launch
Registration	Single Market Platform*
Prequalification	Single Market Platform*
Bid/tenders	Manual submission to EPEX*
Availability/outage information	<b>BM</b> - Data Concentrator File API* <b>Non-BM</b> - ASDP API*
Disarming/re-arming instructions	<b>BM</b> - Existing Reason Codes <b>Non-BM</b> - N/A
Performance metering	<b>BM &amp; Non-BM</b> - Data Concentrator File API* (format update to allow 2Hz** and 20Hz)

\*Will also apply to DC providers, further information to be communicated shortly

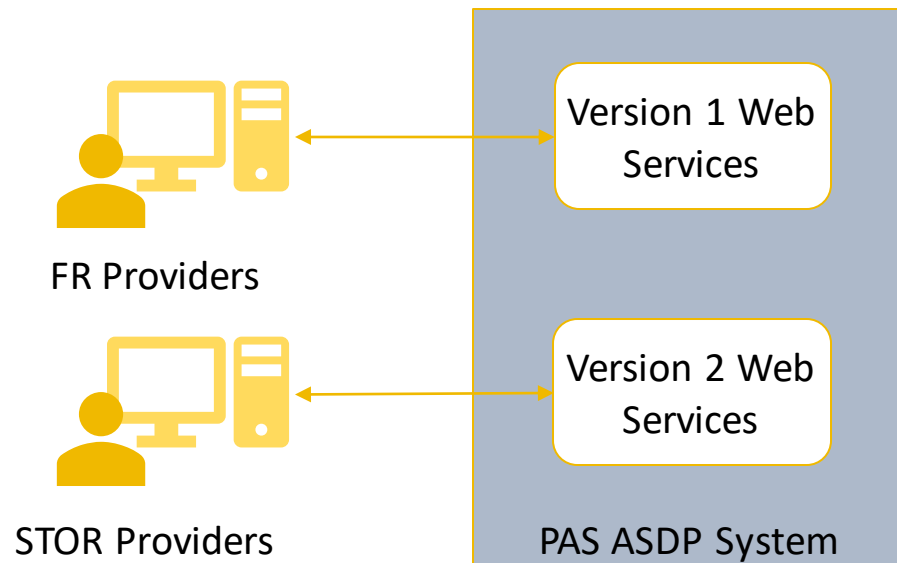

\*\*Performance metering for DR will be 2Hz, however we are implementing a transition phase, allowing 1Hz for the first 6 months

# SP Onboarding Process

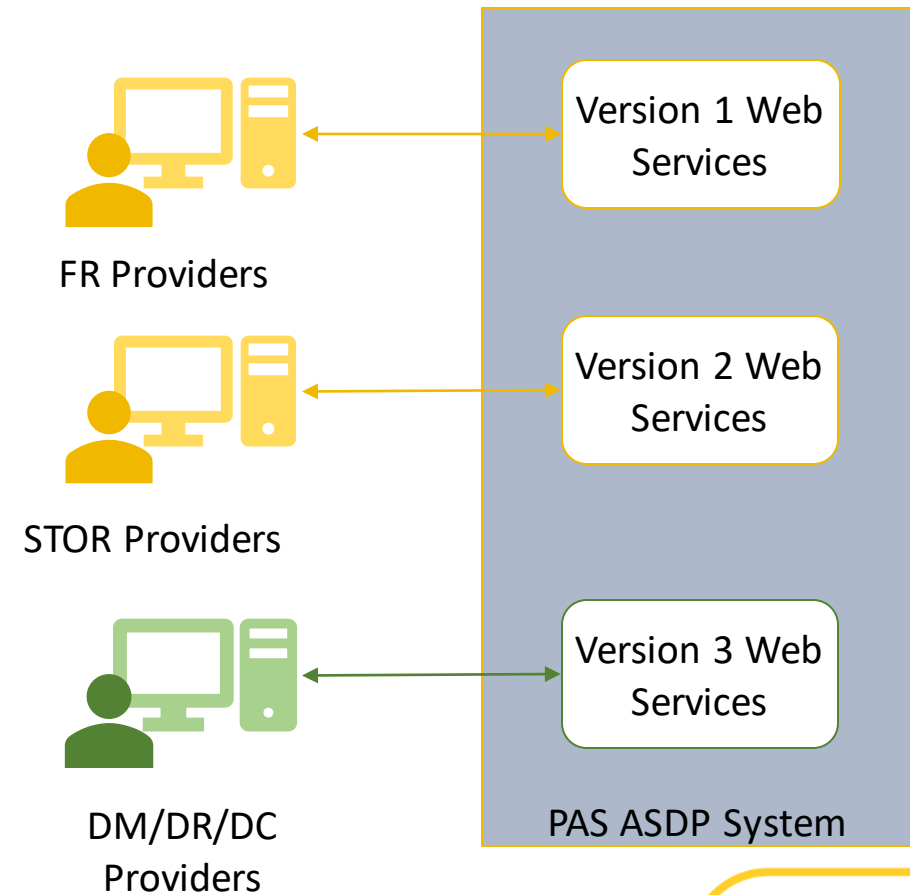

# ASDP Technical Changes

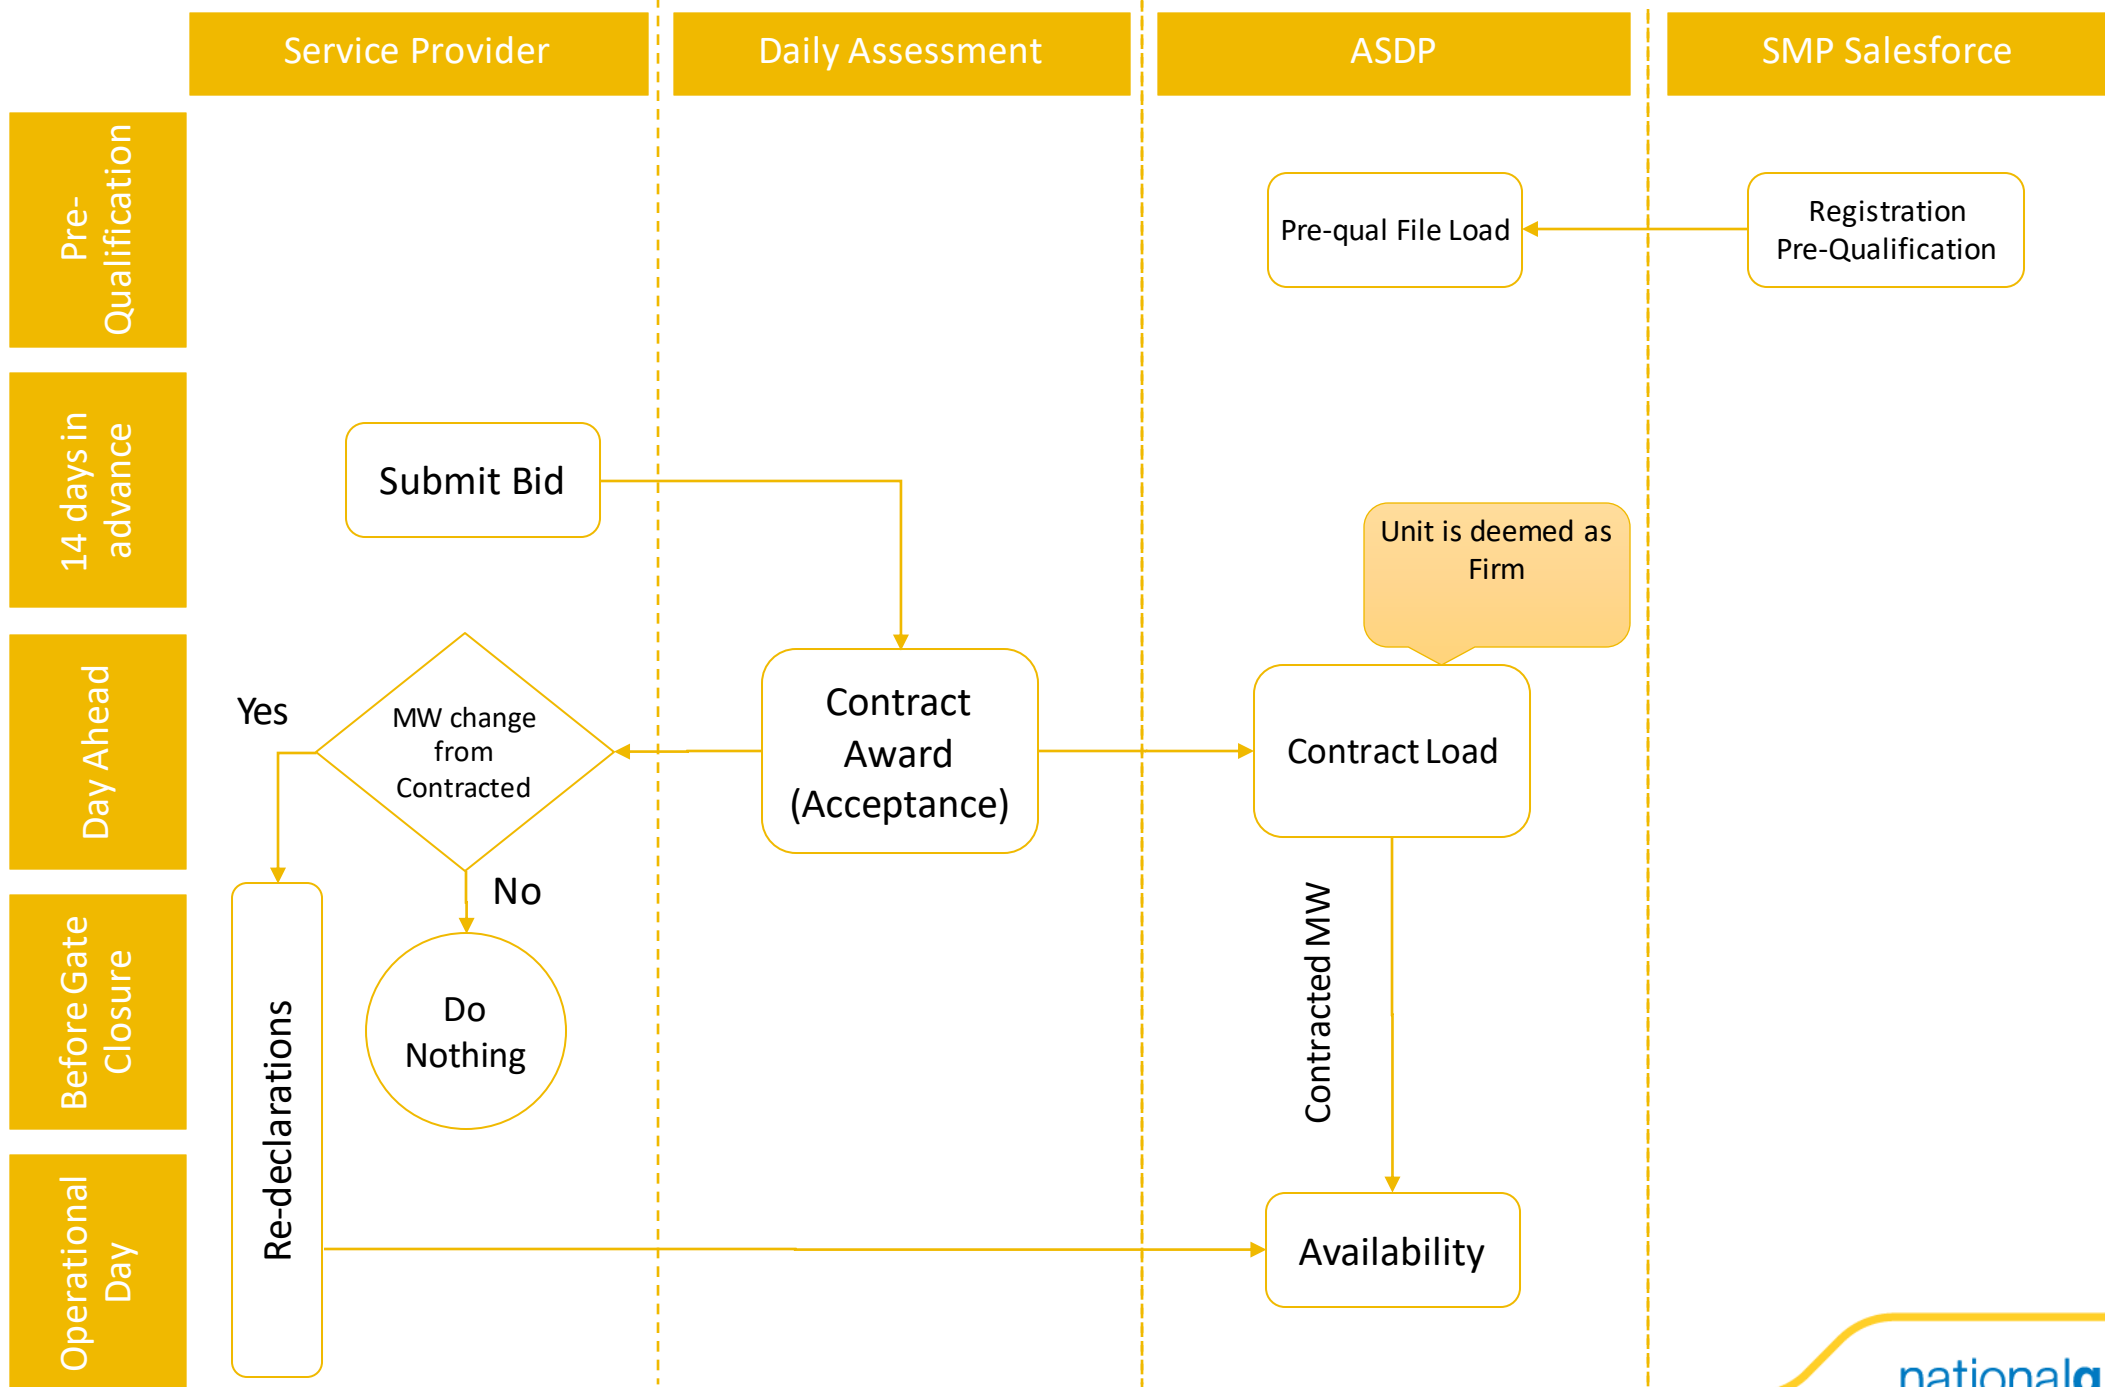

## As Is Process

## To Be Process

# ASR Frequency Response Process

# Technical and Business Rules

## Technical Rules

- Currently only the Availability Service is applicable for the Frequency Response services
- Frequency Response products DM, DR and DC to use the version 3 Web Services as defined in the [Web Services Specification Document](#)
- SOAP v1.1 (?wsdl based)
- APIs via HTTPS
- Datetime in UTC
- Note: ASDP continues to use v1 for FR and v2 for STOR services

## Business Logic

- Window timings are defined as per the contract tendered for the unit.
- Change in availabilities has to be sent on 30 minute settlement period basis
- Unit will be deemed as fully available (Firm) after the contract is awarded by NGENSO
- Change in availability can be submitted only after the contract is loaded into ASDP (D-1 16:00 hrs until real-time) for the D Operational Day
- Declarations/Redeclarations must be only Contracted MW or 0 MW
- More details are provided in [the Business Logic Document](#)

# Next steps

- Providers are welcome to come forward via their Account Manager when ready for testing with the ASDP team
- Testing of ASDP API will form of the prequalification process for DM&DR
- Timeframes for completion of transition to ASDP for DM, DR and DC to be communicated shortly
- Please reach out with any questions via the commercial .box ([commercial.operation@nationalgrideso.com](mailto:commercial.operation@nationalgrideso.com)) or directly via your Account Manager
