STC Panel Headline Report – 27 April 2022

Meeting name System Operator Transmission Owner Code Panel

The STC Panel Headline Report will be produced after every STC Panel and aims to provide an overview of the key decisions made. Minutes and an action log for this meeting will be published separately.

Approval of March 2022 Minutes

Panel Members approved the minutes from the March 2022 Panel meeting which can be found on the National Grid ESO website via the following link.

New STC/STCP Modifications

One new modification had been formally submitted for the April Panel:

CM082: 'STC Governance Improvements'

This modification seeks to provide an improved route to quickly convene modification workgroups with a more proportionate consideration of quoracy.

To provide clarity on the governance arrangements where Panel determinations for STC Procedure (STCP) modifications may need to be paused or reversed following an Authority decision for a corresponding cross-code modification or package of changes.

Panel agreed that this modification should be split, and the proposer will raise 2 new modifications to address quoracy while the other will address the governance process for STCP.

For more details these can be viewed with the Panel Papers.

Draft Modifications

One new draft modification had been submitted to the April Panel.

STCP01 -1: Operational Switching

This is a consequential modification that seeks to allow minor changes to STCP01-1 as required to allow instruction 'by another agreed method' in the situations where a verbal instruction is currently considered appropriate'

More details can be viewed with the Panel Papers.
