

Agenda

Grid Code Development Forum

Date: 3 August 2022	Location: Digital only meeting
Start: 09:00	End: 11:00

Agenda for Grid Code Development Forum (GCDF)

Topics to be discussed	Owner
1. Introductions and review of previous actions	David Halford, NGESO
GCDF	
2. Presentation: Slope Tolerance Range – Proposed Grid Code Amendment	Yun Lei / Arnaldo Rossier, NGESO
3. Verbal Update: Early Competition Workstream	Gareth Stanley / Alastair Grey, NGESO
4. Verbal Update: Digitalised Whole System Technical Code (dWSTC)	Frank Kasibante / Lauren Preston NGESO
5. AOB and Meeting Close	

Slope Tolerance Range - Proposed Grid Code Amendment

Grid Code sections CC.A.7.2.2.3 and ECC.A.7.2.2.3, state that with a tolerance of 0.5% and a Slope setting of 4%, the achieved slope value of voltage controller between 3.5% and 4.5% should be accepted. With consideration to the current new technology, we wish to review this large tolerance range and therefore, we expect the current Grid Code requirement can be updated. A presentation will be shared to cover this proposal.

Early Competition Workstream

Following on from the update shared as part of the July GCDF in relation to the Early Competition Project, the team will return to give a verbal update with regards to the specific Grid Code modifications that will be required to enable Early Competition and signpost how to get involved with their upcoming webinar events.

Digitalised Whole System Technical Code

A verbal update will be shared in relation to the Alignment, Simplification & Rationalisation (ASR) Workstream of the project.
