

The background of the slide is a landscape photograph. It features a range of mountains, with the highest peaks covered in snow. The sky is filled with large, white clouds, and a bright light source, likely the sun, is visible behind the clouds on the left side, creating a strong glow. In the foreground and middle ground, there are several bright, glowing orange and yellow light trails that curve across the landscape, suggesting a long-exposure shot of light or perhaps a metaphorical path. The overall color palette is dominated by the warm tones of the light trails and the cool blues and greys of the mountains and sky.

Review Action 15: Impacts of Storms – feedback from SSEN

- We found that during recent storms a number of generators self-despatched once supplies had returned, we saw that with around 30% of small generation sets. In addition to that a further 25%-30% were either contacted or made contact with out control centre. The remaining took slightly longer to start due to needing site attendance, replace batteries or dry out wind turbines.
