

# Special Grid Code Review Panel Headline Report – 22 November 2022

## Grid Code Review Panel

The Grid Code Review Panel Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

## Draft Final Modification Reports

---

The following Draft Final Modification Report was presented to the Panel:

### **GC0160: Grid Code Changes for BSC Mod P448: "Protecting Generators subject to Load Shedding during a Gas Supply Emergency from excessive Imbalance Charges"**

[The BSC P448 Modification](#) proposes to address the risk of Generators in GB being prevented from generating this winter (due to Load Shedding during a Network Gas Supply Emergency) by allowing such Load Shedding instructions to be settled as Bids. As a result, and to ensure consistency between the BSC and the Grid Code, this Modification seeks to ensure that the actions of the affected party relating to Physical Notifications are aligned.

The Panel has recommended unanimously that the Proposer's solution is implemented, the Final Modification Report has been sent to Ofgem. In line with the Urgent Modification timetable if approved the Implementation date will be 1 working day after the Authority decision.

**GC0160** documentation can be found [here](#)
