

Grid Code Review

Panel Member Biography

**Name:**

Rashmi Radhakrishnan

Role:

Elexon-BSC Panel's
representative on Grid Code
Review Panel.

Biography:

I'm Rashmi, working as Market Architect in Elexon's Design Authority team. Having previously worked in a number of roles at National Grid Electricity System Operator (ESO), I have gained wide range of knowledge in evolving electricity markets, its operations and code governance.

I was appointed as the BSC Panel's representative on the GCRP in Oct 2022. As BSC panels representative I look forward to work closely with other code administrators to ensure that any consequential impacts of other code changes on the BSC (or vice versa) are identified as early as possible, are highlighted to the relevant code panels and are progressed in a timely and efficient manner.
