

# Grid Code Review Panel

## Member Biography

**Name:**

Jamie Webb

**Role:**

National Grid ESO - Panel  
Member

**Biography:**

I have worked in the energy industry for 15+ years, starting my career as a temporary member of staff at Transco in Gas Distribution. From there I went on to study Six Sigma and Lean principles and applied them across the National Grid business across multiple areas of the Gas Distribution and Operation systems for roughly 8 years.

In 2018 I moved into the Code Change area of the System Operator, focusing on the CUSC and the BSC.

In 2020 I moved away from the Commercial side of the Codes and ran the European Frameworks Team, focusing on our new post Brexit relationship with Europe, embedding the Trade and Co-operation agreement between the UK and EU, as well as many Interconnector changes.

As of September 2022, I am now in charge of the ESO Grid Code Team.
