

Code Administrator Consultation

CMP410: Payment Timescales for Monthly Payments

Overview: This CUSC modification updates payment timescales for monthly payments where invoices are issued late.

Modification process & timetable

Have 5 minutes? Read our [Executive summary](#)

Have 20 minutes? Read the full [Code Administrator Consultation](#)

Have 30 minutes? Read the full Code Administrator Consultation and Annexes

Status summary: We are now consulting on this proposed change.

This modification is expected to have a: Low impact on all CUSC Signatories and the ESO

Proposer's recommendation of governance route	Self-Governance modification to proceed to Code Administrator Consultation	
Who can I talk to about the change?	Proposer: Nick George nick.george@nationalgrideso.com 07973 915455	Code Administrator Contact: Paul Mullen paul.j.mullen@nationalgrideso.com 07794537028
How do I respond?	Send your response proforma to cusc.team@nationalgrideso.com by 5pm on 21 March 2023

What is the issue?

In accordance with CUSC 6.6.1 / 6.6.2, the ESO normally issues invoices for TNUoS (including LDTEC/STTEC) and Connection charges on the 1st calendar day of each month, with payment due on the 15th calendar day of the same month. However, in the unlikely event that the invoices were to be issued late (e.g. due to an unexpected billing system failure), then under CUSC 6.6.1 the payment due date jumps to the 15th calendar day of the following month.

The ESO requires the revenue from TNUoS and Connection charges to make payments to the TOs, OFTOs and other parties. Such a disproportionate delay in receipt of the revenue would cause problems in making the payments to the TO, OFTOs etc.

Why change?

The ESO is moving to a new billing system, and thus has been reviewing its business continuity plans. The system is designed with reliability in mind, and with enhanced support in case of issues. It continues to be the ESO's intent always to issue invoices on the 1st calendar day of the month. However, there is always a risk of a short unplanned system outage, and if this was to occur at the time of invoices being issued, it is possible that invoices could be slightly delayed, for example a day late, which could result in customers delaying payment of their invoices by up to a month.

The largest proportion of TNUoS and Connection charge revenue is paid to TOs and OFTOs, and under STC Section E paragraph 4.3, payment is due by the 16th calendar day of the month (or, if later, 15 days from dispatch of invoice).

In order to ensure TOs, OFTOs and other parties can be paid on time, ESO proposes to amend CUSC to better align with STC, such that a one day's delay in issuing invoices would only result in one day's delay in the payment due date, not a whole month.

Note it is not possible for the ESO to issue invoices early, as this would cause VAT issues, as it changes the month in which the VAT liability arises.

What is the proposer's solution?

ESO proposes that CUSC 6.6.2 is amended, as per the legal text below with changes shown in **red text**.

Legal text

6.6.2 **Users** shall pay **Connection Charges** and/or **Use of System Charges** and the **STTEC Charge** and the **LDTEC Charge** and due to **The Company** under the **CUSC** and/or each **Bilateral Agreement** and/or as otherwise notified to the **User** where there is no **Bilateral Agreement**, in accordance with the **CUSC** and/or the **Charging Statements** in the following manner:

- (a) in the case of recurrent monthly charges and the **STTEC Charge** and the **LDTEC Charge** on the **later of**:
 - (i) 15th day of the month **to which the invoiced charges relate; and in which ~~The Company's invoice therefor was despatched (if despatched on the first day of that month) or, in all other cases, on the 15th day of the month following the month in which~~**

- (ii) the 14th day following the day that The Company's invoice ~~therefor~~ was despatched

unless, in any such case, the said date is not a **Business Day** in which case payment shall be made on the next **Business Day**;

What is the impact of this change?

Proposer's assessment against CUSC Non-Charging Objectives	
Relevant Objective	Identified impact
(a) The efficient discharge by the Licensee of the obligations imposed on it by the Act and the Transmission Licence;	Positive This will help ensure that the ESO is able to make payments to other parties as required by its licence.
(b) Facilitating effective competition in the generation and supply of electricity, and (so far as consistent therewith) facilitating such competition in the sale, distribution and purchase of electricity;	Neutral No impact on competition
(c) Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency *; and	Neutral No impact
(d) Promoting efficiency in the implementation and administration of the CUSC arrangements.	Positive This will ensure the collection of charges is not disproportionately delayed in the event of a small delay in issue of invoices.
*The Electricity Regulation referred to in objective (c) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.	

Proposer's assessment of the impact of the modification on the stakeholder / consumer benefit categories	
Stakeholder / consumer benefit categories	Identified impact
Improved safety and reliability of the system	Neutral
Lower bills than would otherwise be the case	Neutral
Benefits for society as a whole	Neutral
Reduced environmental damage	Neutral
Improved quality of service	Positive This change will help ensure there are no delays in making payments to TOs, OFTOs and other parties.

When will this change take place?

Proposer's justification for governance route

Governance route: Self-Governance modification to proceed to Code Administrator Consultation

This is an administrative modification that has minimal materiality and therefore meets Self-Governance criteria. Given that the changes are immaterial a Workgroup should not be necessary and propose this goes straight to Code Administrator Consultation.

How to respond

Code Administrator Consultation questions

- Do you believe that CMP410 Original proposal better facilitates the Applicable Objectives?
- Do you support the proposed implementation approach?
- Do you have any other comments?

Views are invited on the proposals outlined in this consultation, which should be received by **5pm on 21 March 2023**. Please send your response to cusc.team@nationalgrideso.com using the response pro-forma which can be found on the [modification page](#).

If you wish to submit a confidential response, mark the relevant box on your consultation proforma. Confidential responses will be disclosed to the Authority in full but, unless agreed otherwise, will not be shared with the Panel or the industry and may therefore not influence the debate to the same extent as a non-confidential response.

¹ If your modification amends any of the clauses mapped out in Exhibit Y to the CUSC, it will change the Terms & Conditions relating to Balancing Service Providers. The modification will need to follow the process set out in Article 18 of the Electricity Balancing Guideline (EBR – EU Regulation 2017/2195) – the main aspect of this is that the modification will need to be consulted on for 1 month in the Code Administrator Consultation phase. N.B. This will also satisfy the requirements of the NCER process.
