

Code Administrator Meeting Summary

Meeting name: CMP393 - Using Imports and Exports to Calculate Annual Load Factor for Electricity Storage - Workgroup Meeting 7

Date: 05/07/2023

Contact Details

Chair: Teri Puddefoot, ESO Code Administrator - teri.puddefoot@nationalgrideso.com

Proposer: Rob Newton, Zenobe - robert.newton@zenobe.com

Key areas of discussion

The aim of Workgroup 7 was to hold the Alternative Vote and to review legal text.

The Chair introduced the purpose of the Workgroup and confirmed Quoracy.

Review of Timeline and Terms of Reference

Several Workgroup members raised concerns with the timeline, and the Workgroup agreed that the current timeline needs to be revised to allow for further analysis to be done on the defect, and for clarification of the Alternatives before the Alternative Vote.

One Workgroup member raised that more work was required to meet the Terms of Reference for the modification, and several Workgroup members suggested reviewing the Terms of Reference to ensure they still reflect the purpose of the modification.

Actions Review

The chair reviewed actions with the Workgroup as follows:

- Actions 16, 17, 19, 22, 23 and 24 were closed.
- Actions 18, 20 and 21 were updated and can be seen in the actions log below.

Workgroup Alternatives discussion

The Workgroup discussed the Alternatives which were presented at the previous Workgroup meeting. One Workgroup member queried how dispatchable demand would be defined within legal text, and another member suggested that the Alternatives would not fit in scope of CMP393 or CMP405, and suggested they should be another modification entirely. It was agreed that the vote would be postponed to allow for the Alternative proposer to make amendments to the Alternatives prior to voting. The proposer of the Original solution also suggested that they were considering changing their proposal to set floor equal to zero.

Draft legal text, questions and discussion

The legal text discussion was put on hold due to the potential for changes to the Original proposal. It was clarified that the defect of the Original proposal can not be changed, but the

solution can be changed. The chair agreed to look into the circumstances regarding when a proposer is able to raise an Alternative request.

Next Steps

The chair advised the Workgroup on the next steps as follows:

- The next Workgroup will be postponed, and a new timeline provided to the Workgroup.
- Chair to update Panel on timeline changes.
- Zenobe to proceed with analysis and changes to the Original proposal.
- Amendments to be sought to the Alternatives raised by Field Energy.

Actions

Action number	Workgroup Raised	Owner	Action	Comment	Due by	Status
18	WG6	TP	Contact Workgroup Consultation Respondents to make them aware of a typo, and whether their responses would change because of this	Awaiting some responses and will circulate to Workgroup	WG8	Open
