Commentary

A mostly long market during the day. Interconnector Trades were required for Margin during the morning to midday and into the early afternoon. Trades supported overnight Voltage Control in the North West and the South East of England. Trades and BM Action alleviated thermal import constraints in the South East of England around midday and in the late afternoon to evening period. BM Action managed thermal export constraints in the Wales area from midday, and in the East of England in the evening. BM Action was required for thermal export constraints in Scotland during the day.
