Commentary

The market was long for most of the day, except for 00:00-02:30, 07:00-07:30, 21:00-22:00 and 23:00-23:30 where it was short. Trades were required for margin. BM actions were required to support inertia and to manage thermal export constraints in Scotland. Trades and BM actions supported voltage control.
