Commentary

The market was predominantly short throughout the day until late evening. Interconnector Trades throughout the day for downward regulation.

Overnight Voltage Control supported mainly by Trades. BM Actions throughout the day and from late morning onwards for RoCoF, supported by Trades. Thermal export constraints in the North required BM Actions to alleviate over the morning and evening periods. ODFM was enacted for periods on 5th July and the associated costs are not reflected in these numbers due to reconciliation timelines. Please see MBSS for July for more details.
