Commentary

A short market overnight and into midday, becoming long from midday except for the 6.30pm to 8pm period in the evening. Some Interconnector Trades were required for Margin between 6am and 8am. Interconnector Trades alleviated thermal export constraints in the South Coast of England throughout the day, with BM Action assisting during the day. BM Action managed thermal export constraints in Scotland during the evening. Overnight Trades and BM Action for Voltage Control in the Midlands and North West of England. Trades for RoCoF overnight.
