AS Cost (Estimate)

SBP/SSP Vs NIV 24-Jul-2022

Commentary

A mainly short market throughout the day. Interconnector Trades were required for Margin during the evening and for Response in the early hours of the morning. Trades managed thermal import constraints in the South East of England in the evening to night. BM Action alleviated thermal export constraints in the East of England and the North of England. Overnight Voltage Control supported by Trades and BM Action in the Midlands. BM Action during the morning assisted with System Inertia.
