BM Cost (Indicative)

AS Cost (Estimate)

## Commentary

The market was short in excess of 1200MW from the late morning until the evening peak. Multiple trades on the interconnectors were undertaken between midnight and the evening for positive margin. From the afternoon onwards, multiple trades on the interconnectors were required to solve power flow import constraints in the south east area of England. BM Actions were taken throughout the 24 hours to buy off wind generation to solve power flow restrictions in Scotland.
