

Date: Tuesday 23 Aug 2022

BSUoS Charge Estimate: £10.57/MWh
Total Outturn: £11.92m

Daily Balancing Costs

BM Cost (Indicative)
AS Cost (Estimate)

Commentary

The market was prevalently short throughout the 24 hours. For most of the day, multiple trades on the interconnectors were undertaken for positive margin. In the early morning, interconnectors were traded to solve power flow import constraints in the southeast of England. For most of the day, BM actions were taken to ease constraint in the south of England and overnight BM actions were required to solve power flow restrictions in Scotland.
