

Date: Sunday 21 Aug 2022

BSUoS Charge Estimate: £12.85/MWh
Total Outturn: £11.93m

Daily Balancing Costs

BM Cost (Indicative)
AS Cost (Estimate)

Commentary

Throughout the 24 hours there were periods of short markets in excess of 1200MW. From the afternoon onwards, multiple trades on the interconnectors were taken for positive margin. After midnight some trades on the interconnectors were required to solve import constraints in the southeast of England. Additionally, between midnight and the early morning, BM actions were taken to solve power flow restrictions in Scotland. BM actions were also required throughout the 24 hours to ease constraints in the south of England.
