## Commentary

The market was short in excess of 500MW in the morning and short in excess of 800MW in the evening. Due to tight margin, SpinGen was required from the morning until the evening. BM actions were required overnight to solve power flow congestion on the England Scotland border due to planned outages. Multiple trades on the interconnectors and BM actions were required throughout the 24 hours for RoCoF. Overnight, voltage levels in England were managed with a mix of trades and BM actions.
