BSUoS Charge Estimate: £19.02/MWh

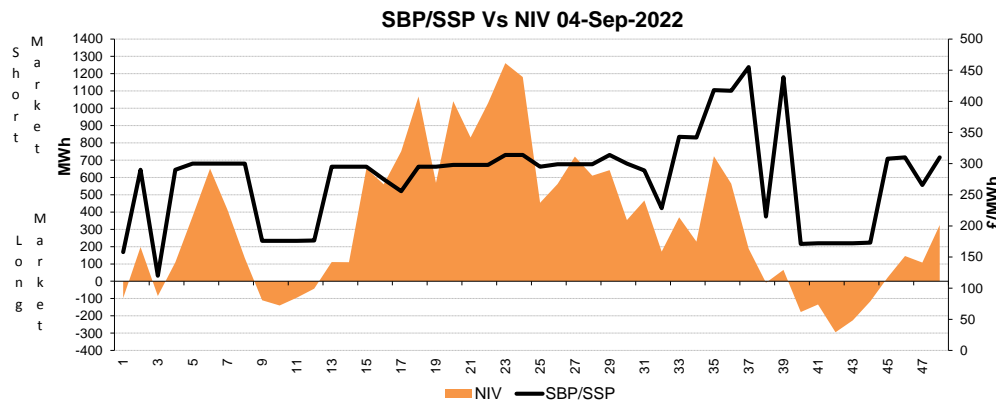

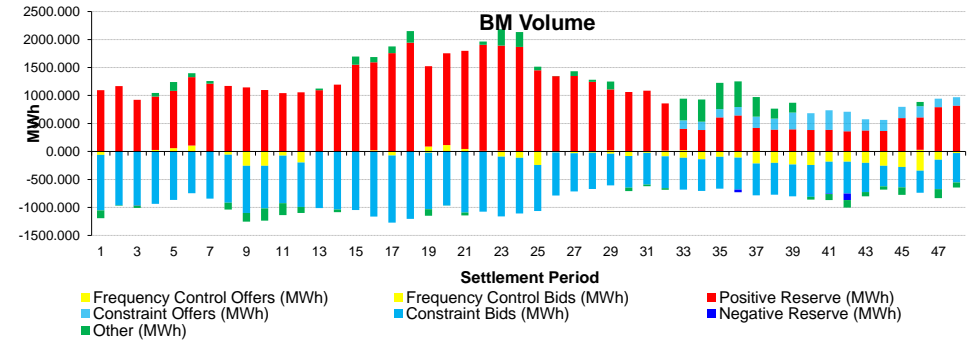

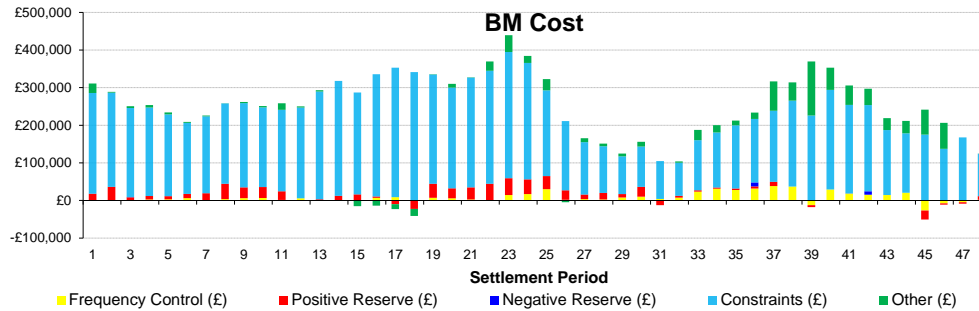

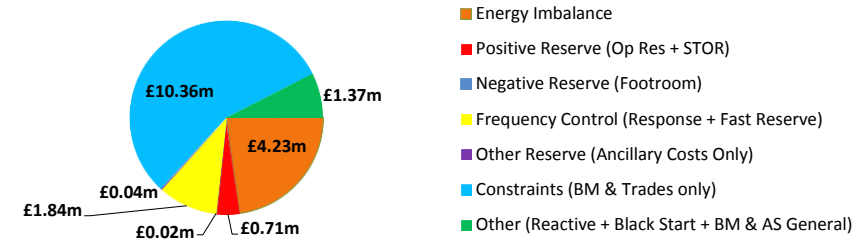

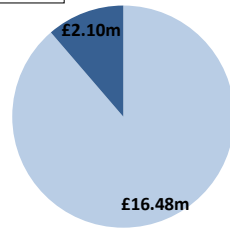

Total Outturn: £18.59m

# Daily Balancing Costs

**nationalgrid**ESO

BM Cost (Indicative)

AS Cost (Estimate)

## Commentary

A mainly short market until the early evening, and short again during the late night onwards. Interconnector Trades were required for Margin throughout the day. Trades managed localised thermal export constraints in Scotland over the late morning to midday period, and thermal import constraints in the South East of England from late afternoon onwards. BM Action was required for thermal export constraints in Scotland during the morning. All overnight Voltage requirements met by the market.
