SBP/SSP Vs NIV 07-Oct-2022

Commentary

A mostly short market from the early hours of the morning onwards. Interconnector Trades were required for Margin between 8pm and 9pm in the evening. 1200MW of Non-BM Fast Reserve was run over the morning period, and 350MW of STOR over the late afternoon.

Trades and BM Action supported overnight Voltage Control. BM Action assisted with System Inertia overnight. BM Action alleviated thermal export constraints in Scotland and the North of England overnight and into the day. BM Action managed thermal import constraints in the South East of England during the late morning.
