BM Cost (Indicative)

AS Cost (Estimate)

SBP/SSP Vs NIV 05-Nov-2022

Commentary

The market was mostly long in the morning to midday and from late evening onwards. Interconnector Trades were required for Downward Regulation overnight and for Margin during the day. Trades and BM Action supported overnight Voltage Control. BM Action assisted with System Inertia overnight. BM Action managed thermal export constraints in the North of Scotland during the day and in the East of England during the afternoon to evening period.
