

Date: Friday 24 Dec 2021

BSUoS Charge Estimate: £1.95/MWh

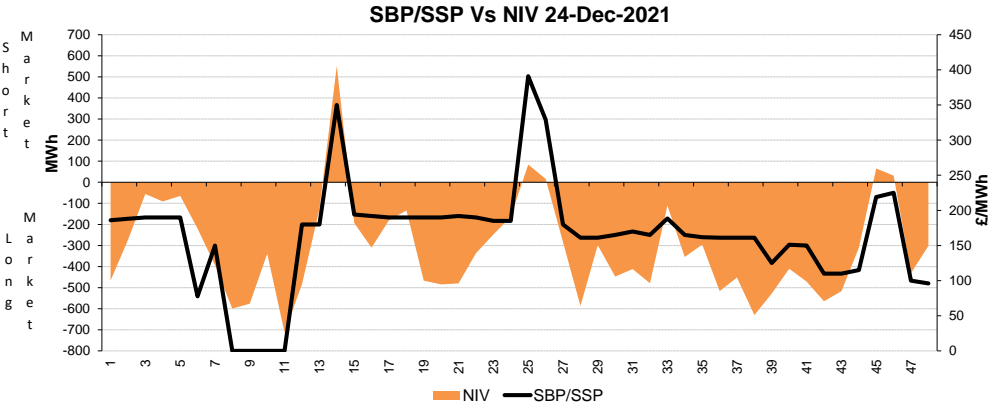

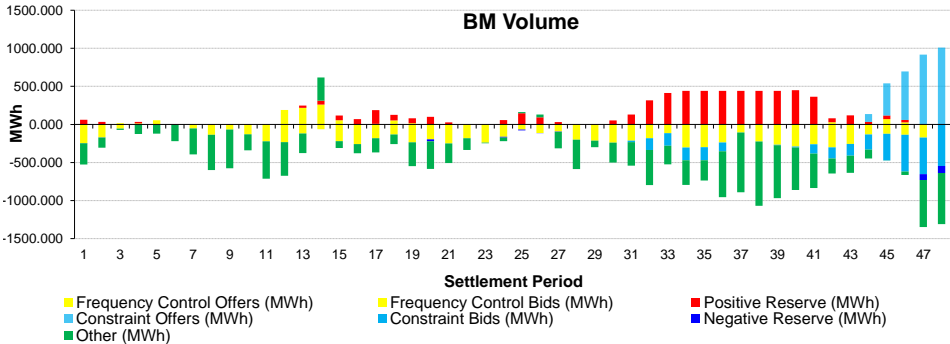

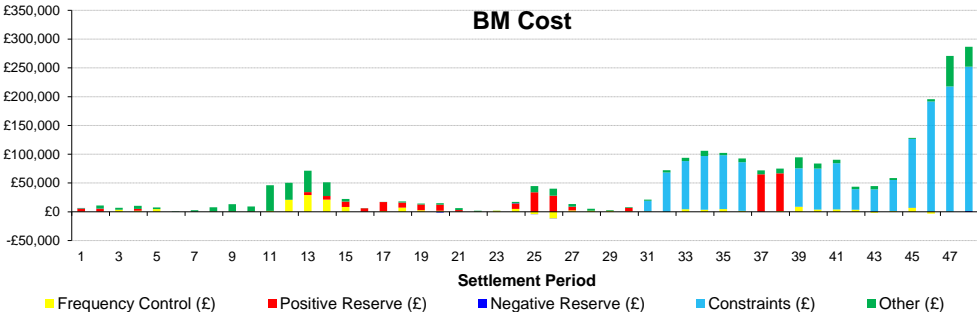

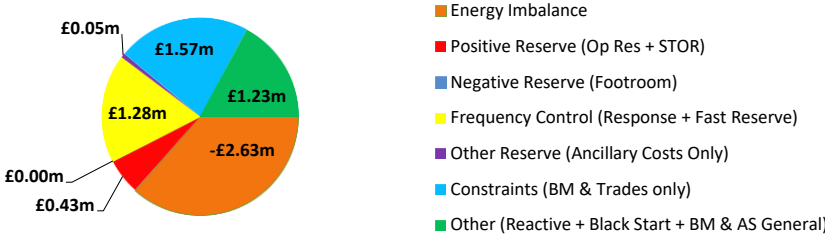

Total Outturn: £1.96m

BM Cost (Indicative)

AS Cost (Estimate)

# Daily Balancing Costs

## Commentary

The market was prevalently long throughout the 24 hours. Some trades on the interconnectors were required before midnight for downward regulation. BM actions to buy off wind generation were required between the afternoon and the late evenering to solve power flow restrictions on the England-Scotland network boundary. Before Midnight, offers were accepted in the BM to manage the voltage levels in England.
