

Date: Thursday 26 Jan 2023

BSUoS Charge Estimate: £5.90/MWh

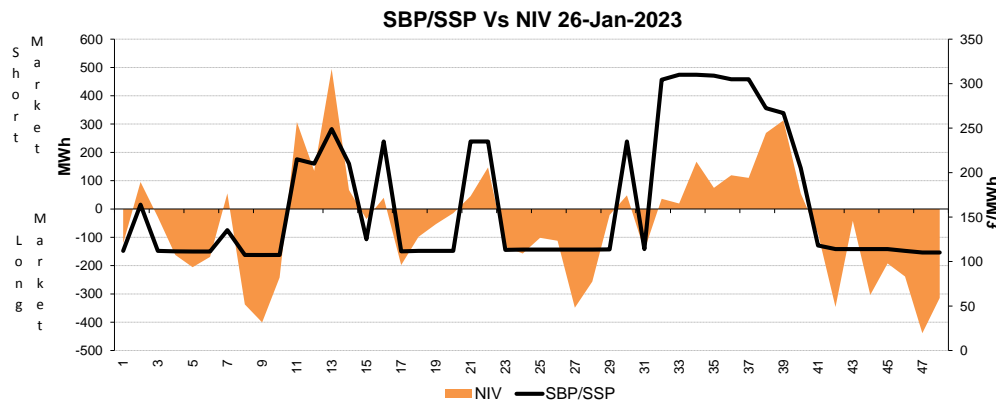

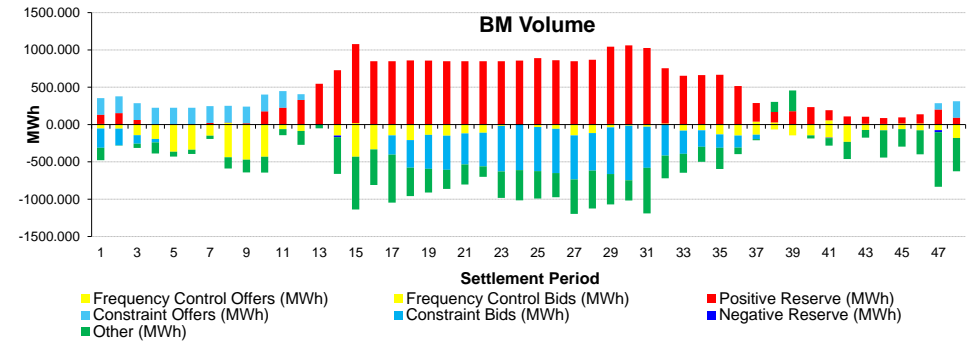

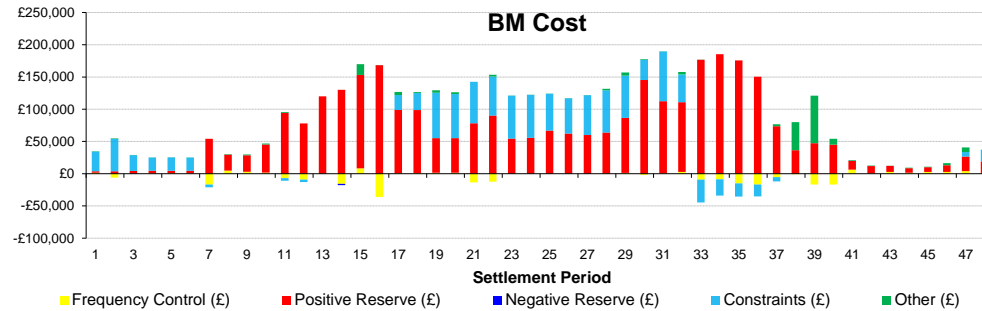

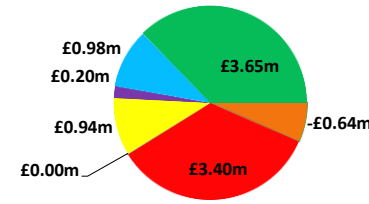

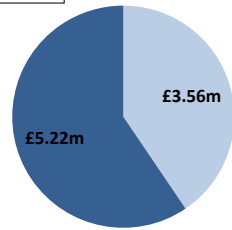

Total Outturn: £8.78m

# Daily Balancing Costs

nationalgridESO

BM Cost (Indicative)

AS Cost (Estimate)

## Commentary

The market fluctuated between long and short throughout the day. No trades were required. BM Actions managed thermal export constraint in the North East of England from mid morning to mid afternoon, BM Actions also managed stability export in the South of Wales for this same period. BM Actions and Trades were required for overnight voltage control.
