Commentary

A long market overnight becoming short from early morning onwards until the late evening. Interconnector Trades were required overnight to 7am for Downward Regulation. Trades and BM Action overnight supported Voltage Control. BM Action in the early hours assisted with System Inertia. Trades alleviated localised thermal export constraints in Scotland between 10am and 9pm. BM Action managed thermal export constraints in the North of Scotland from 6am onwards into the night, and in the Wales area during the afternoon and evening periods.
