

Date: Sunday 31 Oct 2021

BSUoS Charge Estimate: £11.33/MWh  
Total Outturn: £13.33m

Daily Balancing Costs

BM Cost (Indicative)  
AS Cost (Estimate)

Commentary

The market was short in excess of 1000MW in the morning and in excess of 600MW in the late evening. Multiple trades on the interconnectors for downward regulation were undertaken for most of the day. Between the morning pick up and the darkness peak, a large volume of BM actions was required to buy off wind generation in order to solve power flow restrictions in Scotland due to high wind levels. Overnight, offers were accepted in the BM to manage the voltage levels in England. During the morning pick up some trades on the interconnectors were taken to mitigate RoCoF risk.
