**BSUoS Charge Estimate: £3.66/MWh**  
**Total Outturn: £3.32m**

BM Cost (Indicative)  
AS Cost (Estimate)

# Daily Balancing Costs

**Commentary**  
The market was short in excess of 900MW in the late evening. The low demand levels required multiple trades on the interconnectors for downward regulation, from the morning pick up until the late evening. Overnight, the voltage levels in England were managed with a mix of BM actions and trades. In order to mitigate the RoCoF risk, multiple trades on the interconnectors and BM actions were undertaken throughout the 24 hours.
