BSUoS Charge Estimate: £3.82/MWh
Total Outturn: £4.79m

BM Cost (Indicative)
AS Cost (Estimate)

Daily Balancing Costs

Western Link status: Available

Commentary

The market was short in excess of 900MW until the afternoon and in excess of 1100MW afterward. In the afternoon, trades on the interconnectors were required for downward regulation. Overnight Trades and BM Actions supported Voltage Control. BM Actions required from midday into the evening for RoCoF, with Interconnector Trades throughout the day. Thermal export constraints in the North of Scotland and the South East were alleviated by BM Actions in the evening.
