Terms of Reference

Elana Byrne– National Grid ESO Code Administrator

CM079 – Consideration of STC/STCP changes in relation to CMP330/374

Workgroup Term of Reference	Location in Workgroup Report (to be completed at Workgroup Report stage)
a) Quantitative assessment of the STC/STCP's, which will need to change to facilitate implementation of CMP330/CMP374/CMP414	
b) Impact assessment against STC Applicable Objectives of ToR (a)	
c) Ensure the appropriate Industry experts or stakeholders are engaged in the Workgroup to ensure that all potentially affected stakeholders have the opportunity to be represented in the Workgroup	
d) The cross Code impacts this Modification has on CMP330/CMP374/CMP414 solution and other areas of the CUSC	
e) Consider the regulatory consequences of implementing CMP330/CMP374/CMP414 and CM079, in particular related transmission licence provisions and price control processes - ideally summarising potential areas for future conversations with the Authority if required

CM079 Solution Map – 23 August 2023

TO/ESO interaction	CMP374/414 Solution/Consequence	STC Changes (those in blue to be actioned as the CM079 solution, others to be addressed separately)	Change RAG	Wider considerations
Customer / ESO application stage	Contestability signalled as part of the application	Schedule 5+6 (STCP18-1 to follow?)	Green	STC would need to define the concept of contestability.
	ATOCO (Affected Transmission Owner Construction Offer) process may need to be adjusted for where potential works extend or influence beyond one TO area			Intervention process for multiple relevant TOs
	Fixed Application Fee charges may need to change			Charging Statement adjustment plus STCP19-6?
Intervention Process	Pre-emptive Intervention can be initiated – how; when?	Section D Part Two – new paragraph	Orange	Possible new STCP to provide finer detail?
	Process for where ESO and relevant TO disagree on exercising intervention right	Section H	Orange	
	Process for coordination between ESO and relevant TO for User-led disputes re. intervention via CUSC	Section D Part Two – new paragraph	Red	Raise ambiguity of roles (consequence of CUSC solution) with Ofgem
Works Delivery (subject to agreed Adoption Agreement)	Process for User failure to deliver works as agreed (above and beyond Adoption Agreement terms)	TBC following conversation with Ofgem	Red	Matters for Adoption Agreement + licence + Price Control
Definitions	Create new definitions to facilitate the changes needed	Section J	Green	

Change RAG Key:

	Major change/risk (substantial changes required - either large-scale adjustments to existing provisions or to add new sections. These changes may have material associated risks/impacts on STC parties).
	Moderate change/risk (some changes required: either to adjust existing provisions or to add new paragraphs. These changes may have minor associated risks/impacts on STC parties)
	Minimal-to-no change/risk (i.e. housekeeping adjustments at most with no associated risk to STC parties)
