

Element	Difference	Explanation
1 Methodologies	Significant Change and Material Technology Change Guidance references removed in respect of CMP435.	As Significant Mod Apps (other than as set out in Element 4) are not part of the CMP435 Proposal.
2 Primary Process	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As Annual Application Process and two formal gates in an enduring sense are not applicable and relevant contractual information (related to CMP435) is included in Element 19.
3 Scope	Updated table to reflect projects in scope for CMP435 and removal of final bullet in respect of new BEGAs/BELLAs.	To clarify that new applications and Significant Modification Applications are not within scope for CMP435 (other than as set out in Element 4).
4 Significant Mod Apps	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As Significant Mod Apps (other than as set out in Element 4) are not part of the CMP435 Proposal.
5 Process Differences	Removed DFTC Process Difference and removed elements of Offshore Project Process Difference related to Gate 1 LoA requirement and the paragraph related to descoping greater TCE/CES process integration.	As these aspects are not part of CMP435.
6 Gate 1 Process	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As Gate 1 Process is not part of CMP435.
7 Fast Track Disagreement	This element is not part of the CMP435 (or CMP434) Proposal.	As Fast Track Disagreement Resolution Process no longer in scope of either code modification.
8 Longstop Date	Clarification that for existing connection contracts the 3-year period commences at the point at which they become akin to a Gate 1 contract (as set out in Element 19). Also included new text on Embedded Generation.	To minimally adjust the longstop date proposal for CMP435.
9 Project Designation	Amended text to refer to Gate 2 to Whole Queue Process as being when this may be used rather than in the Gate 1 and/or Gate 2 and/or Capacity Reallocation Processes.	As this is only relevant to Gate 2 to Whole Queue Process in the context of CMP435.
10 Reservation	Amended text to refer to Gate 2 to Whole Queue Process as being when this may be used rather than in the Gate 1 and/or Gate 2 Processes. (Included in CMP435 for reference – proposed to not be codified within the CUSC, but intended to be codified within the STC via <a href="#">CM095</a> )	As this is only relevant to Gate 2 to Whole Queue Process in the context of CMP435.

11 Gate 2 Criteria	Prior to Authority Decision Date, there is no minimum period for the Option Agreement, and projects that have met M1 and/or progressed beyond M1 will also not need to meet the CMP434 minimum option length requirements.	To minimally adjust the Gate 2 criteria for CMP435.
12 Gate 2 Process	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As Gate 2 Process is not part of CMP435.
13 Self-Declaration	That note that Gate 2 projects can request advancement when self-declaring they have met the Gate 2 criteria.	To minimally adjust the self-declaration process for CMP435.
14 Gate 2 Offer / Project Site Location Change	Noting that this would only be applicable for Transitional Offers/Agreements or Step 1 Offers in the context of CMP435.	To minimally adjust the proposal for CMP435.
15 Primary Process Licence Timescales	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As related to Gate 1 and Gate 2 Process.
16 CNDM	Amended to refer specifically to the Gate 2 to Whole Queue Process.	To minimally adjust the proposal for CMP435.
17 EG and Gate 1 (DFTC)	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As DFTC and Gate 1 Offers (other than as set out in Element 19) are not part of CMP435.
18 EG and Gate 2	This element is not part of the CMP435 Proposal and is only part of the CMP434 Proposal.	As relevant aspects of Element 18 have instead been included within Elements 8, 11, 12, 13, 19 and 20.
19 Contract Changes	New CMP435 Section (i.e. not part of CMP434).	Changes to Current Connection Agreements only applicable in the context of CMP435.
20 Cutover Arrangements	New CMP435 Section (i.e. not part of CMP434).	Cutover Arrangements only applicable in the context of CMP435.
